

# TECHNICAL SUPPORT

## HOW TO MAKE THINGS WORK ON SITE

**NO.1**

### CHOOSE THE CORRECT MACHINE

-  Height
-  Width
-  Length
-  Weight
-  Outreach
-  Power
-  Noise

### HAS ANYTHING CHANGED ON SITE?

Building sites are dynamic places that change from day to day. Before ordering your machine, check has anything changed on site.

**NO.2**

**NO.3**

### FAMILIARISATION AND TRAINING

- Does your operator hold a current certificate of training/operator card for the correct MEWP category?
- Is your operator familiar with the model and make of MEWP being used?

**NO.4**

### LOCATE THESE STICKERS ON YOUR MACHINE

### HELPFUL HINTS

- If you are using a battery machine, always plug it in at night.
- If you are using a diesel machine, always keep the tank full.
- Love your machine! Look after the machine to avoid damage charges. Better trained personnel means more uptime and less damage.
